Section 1 – Purpose

The Ministry of Transportation's **Connecting Links Program** provides dedicated provincial funding for road and bridge projects on designated connecting link highways.

The Connecting Links Program has been re-designed to provide a sound basis to make provincial funding decisions and ensure that provincial financial accountability and asset management requirements are met. Through a structured application process all applicants are considered in a consistent and transparent manner.

This Program Guide has been prepared to assist connecting link municipalities in completing and submitting the application. The guide includes legislation that applies to connecting links, a detailed description of the scope of work eligible for funding and the requirements for detailed information on connecting link condition and improvement needs.

Applicants are encouraged to contact their local regional office to ask any questions before submitting an application.

The ministry will review all submissions and will notify successful and unsuccessful applicants after funding decisions are made in early 2025.

Funding decisions will be based on an assessment of connecting link needs, the ministry's prioritization of submitted projects and the available budget in any year.

Section 2 – Objectives

The objectives of the program are to make connecting link investments that:

- Address critical connecting link improvement needs;
- Extend the life of the asset;
- Are cost effective and appropriate to address the connecting link need; and
- Ensure the safe and efficient movement of provincial traffic.

The ministry will prioritize projects that best meet these objectives and focus on addressing critical and urgent connecting link needs first. The Connecting Links Program requires that municipalities submit detailed information on all connecting link road section and structures. This will enable the ministry to assess the current and future state of connecting link infrastructure and determine how to best target connecting link investments on a multi-year basis.

Section 3 – Connecting Links Policy

Connecting links are municipal roads that connect two ends of a provincial highway through a community or to an international or interprovincial border crossing. These are critical roadways that serve provincial and municipal interests, as they carry long-distance provincial highway traffic moving through communities, as well as local traffic within the community.

Connecting links are formally designated under section 21 of the *Public Transportation and Highway Improvement Act*, R.S.O. 1990, c. P. 50 as amended. Under the Act, a connecting link remains a "highway" under the jurisdiction and control of the municipality.

Connecting links are typically under the ownership of a lower tier municipality or a single tier municipality. Where a connecting link intersects with an upper tier highway, the intersection remains under the jurisdiction and control of the upper tier municipality. These intersections are eligible for funding under the Connecting Links Program.

The Connecting Links Program provides funding for eligible capital improvement costs – not maintenance. The responsibility for maintenance of connecting links lies with the municipality. Under section 44 of the *Municipal Act*, R.S.O. 2001, the municipality that has jurisdiction over a highway or bridge must keep it in a reasonable state of repair.

Ontario has set out Minimum Maintenance Standards for municipal highways, including connecting links, under the *Municipal Act*. Ontario Regulation 239/02 provides municipalities with guidelines for maintaining municipal highways including winter maintenance, roadway and sidewalk surface condition, traffic control signal systems, regulatory and warning signs, etc.

Ontario Regulation 104/97 of the *Public Transportation and Highway Improvement Act* requires that municipalities visually inspect bridge structures with a span of greater than or equal to three metres (in the direction of traffic) at least once every two years by, or under the direction, of a professional engineer. To be eligible for the Connecting Links Program, municipalities will be required to submit a Municipal Structure Inspection report to MTO every two years for each connecting link bridge and culvert three metres or greater in length (in direction of traffic) as they are completed.

The ministry has the authority under the *Bridges Act* 1990, c. B.12, to approve connecting link bridge projects. MTO will review structure inspections on an ongoing basis and assess proposed structure projects to ensure that critical structure needs on connecting links are addressed.

Under the *Highway Traffic Act*, R.S.O. 1990, c. H.8, the ministry has the authority to approve all municipal by-laws and traffic control signals that restrict or interrupt the flow of through traffic on the connecting link highway including, but not restricted to:

- Limiting weight on bridges;
- Erection of traffic controls and pedestrian signal systems; and
- Regulating motor vehicle traffic on connecting links.

Appendix 1 includes sections of legislation that applies to connecting links. Municipalities should consult with the ministry to ensure that necessary approvals will be in place prior to connecting link funding being granted.

Section 4 – Program Overview

Which municipalities are eligible?

The Ministry of Transportation's Connecting Links Program provides dedicated provincial funding for road and bridge projects on connecting link highways designated under the *Public Transportation and Highway Improvement Act*.

All 77 Ontario municipalities with designated connecting links are eligible for funding. Eligible municipalities and designated connecting link road sections are listed in **Appendix 2**.

A municipality with one designated link is permitted to submit one project per year. A municipality that has more than one designated connecting link may submit a maximum of two projects per year. If submitting for two projects however, each application must be for a project located on separate connecting link sections as identified in **Appendix 2**. No more than one application per connecting link section is permitted by a municipality.

What amount of funding can be requested?

Connecting links serve both provincial and local traffic needs; therefore, a provincial-municipal cost sharing partnership is considered appropriate.

The ministry will provide funding for up to 90% of total eligible project costs. The maximum amount of funding for eligible costs is \$3 million per road project, and up to \$5 million per bridge project. Project proposals should include a detailed scope of work and cost estimates.

The applicant is required to contribute the remaining 10% of eligible project costs and pay for all ineligible project costs. The municipality cannot use capital funding from any other capital application program for the same road or bridge project funded under the Connecting Links Program.

Despite the foregoing, general formula based, or other non-application-based funding revenue received from other provincial or federal sources may be used towards a municipality's 10% contribution.

When would funding be provided?

Once funding decisions are made, the ministry will notify successful applicants that their project has been approved for funding. Municipalities may then begin the tendering process and incur project costs starting April 1, 2025. The ministry will provide a Contribution Agreement following the Minister letter.

The execution of the Agreement is required before payments can be made. Payments will be made on a milestone basis (refer to Section 8).

Section 5 – Project Eligibility

What are eligible connecting links projects?

The Connecting Links Program provides funding for the design, construction, renewal, rehabilitation and replacement of connecting link infrastructure. Maintenance costs, including winter maintenance, are not eligible for funding.

Connecting Links projects may be one, two, or three years in duration. Applications for projects with a forecasted completion time greater than 3 years will not be considered. Regardless of the duration, award of the first contract related to the project must occur within the first year of the project. See Sections 8 and 9 for additional information regarding milestones.

A municipality may submit for detailed design and construction as one project; or alternatively, a municipality may submit detailed design for funding as a separate project prior to construction. In the case of the latter, however, the ministry cannot guarantee funding for the construction project in the subsequent year. Funding for the construction would be considered along with other projects submitted in the following year.

Expansion projects (road widening) resulting from general traffic growth (provincial and municipal), will be considered eligible projects. However, the costs for improvements directly related to increased traffic from new development or major expansion of an existing development continue to be the responsibility of the municipality (and/or the developer).

As noted below, land acquisition and the cost of municipal infrastructure within the connecting link right-of-way are not eligible for funding under the Connecting Links Program, such as watermains, sanitary sewers, utilities, etc.

The proposal must not include multiple projects, e.g., projects on separate roads or structures that are not connected. Proposals can include various related works such as road reconstruction and storm sewer repair; road and intersection improvements; multiple spans on one structure; and, structure replacement and approach road improvements like guiderail.

NOTE: The same connecting link **road or bridge** project cannot be submitted under both the Connecting Links Program and another capital application program. A municipality may, however, submit an application for **water or wastewater** work on a connecting link under another funding program. If the same **road or bridge** project is submitted under multiple capital application programs, it will become ineligible for funding under the Connecting Links program.

Projects already underway or awarded at the time of the application period will be deemed ineligible for the program.

What project costs are eligible/ineligible for reimbursement?

Funds can be used for:

- Environmental Assessment costs
- Design/Engineering costs
- Project Management/Contract Administration costs
- Materials
- Construction

Funds cannot be used for:

- Costs incurred before project approval or after committed project completion date
- Land acquisition
- Leasing land, equipment, buildings and other facilities
- Financing charges
- Legal fees

Appendix 3 outlines the scope of eligible work for connecting link projects with more specific requirements detailed in Annexes A-G of **Appendix 4**. MTO encourages municipalities to consider sustainable construction practices for connecting link projects as described in **Appendix 5**.

The connecting link right-of-way typically includes some municipal infrastructure that is not eligible for funding under the Connecting Links Program, such as watermains, sanitary sewers, utilities, etc. The municipality is responsible for costs related to these assets and all other ineligible items.

Municipalities should consult with MTO regional offices (listed in Section 10) to seek clarification on eligible project costs before submitting an application.

What are the eligible project net costs?

The application form requires that the applicant indicate the eligible project net costs, which is the eligible project costs under the Connecting Links Program, *excluding the HST rebate that the municipality expects to receive*. The maximum provincial funding contribution will be 90% of the net eligible costs up to a maximum of \$3 million per road project, and up to \$5 million per bridge project. It is the applicant's responsibility to determine the HST rebate.

Section 6 – Application Submission

The Connecting Links Program has a one-stage application process, where eligible connecting link municipalities are requested to submit specific project information through a standard application form along with supporting documents.

Where can I obtain an application?

The information on how to submit an application is available online at: <https://www.app.grants.gov.on.ca/gr/tpcr/#/externalLogin>

For more information, please call the Program Coordinator at 289-241-8354 or reach out to your local regional Ministry of Transportation office contact, listed in Section 10 of the Program Guide. You can also send an email to the program email address: CLProgram@ontario.ca.

When are applications due?

Applications are due by Wednesday, November 13th, 2024, at 5:00 p.m. Eastern Standard Time (EST).

Section 7 – Project Application

Municipalities are required to complete a project application form to be eligible for connecting link funding. This will provide a consistent basis for the ministry to assess the proposed project and the municipality's multi-year connecting link needs.

In addition to the application form, municipalities must submit a council resolution (template available upon request) that:

- a) demonstrates council's support of the project identified in application;
- b) confirms that capital funding is available for the municipal contribution component;
- c) indicates that if the application is successful, that the municipality will proceed with the project in accordance with the timelines specified in the application.

Application Section	Requirements
16. Declaration	Certification by municipal official that: <ul style="list-style-type: none"> ▪ The submitted Application meets the requirements of MTO's Connecting Links Program as described in the Program Guide; ▪ A comprehensive Asset Management Plan including connecting links has been completed and publicly posted; ▪ The municipality will comply with the conditions that apply to designated connecting links under the Highway Traffic Act to ensure the safe and efficient movement of provincial traffic; ▪ The project put forward in the application will be completed and the milestones met as stated in the Application; and ▪ The Application is complete and factually accurate.

What are the Application Asset Management Plan requirements?

There are four asset management planning requirements for connecting link municipalities.

1. Asset Management Plan

Municipalities applying for connecting link funding must have a recently completed and publicly posted asset management plan indicating the asset condition, capital and maintenance needs, investment priorities and financial strategy for all core infrastructure which includes road, bridge, water and wastewater assets.

If the applicant has previously provided a municipal asset management and there are no updates, there is no need to resubmit the same asset management plan. If the applicant has updated the plan or if it's the first time applying to the Connecting Links Program, the applicant is required to provide access to the plan.

2. Connecting Link Structure Inspection

Municipalities are required to submit a Municipal Structure Inspection Manual (OSIM) or equivalent inspection report every other year for each connecting link bridge and large culvert three metres or greater in length (in the direction of traffic).

If the applicant has previously submitted all current Municipal Structure Inspection Forms, there is no need to resubmit the inspection forms. However, if there are updated inspections they should be submitted. If it's the first time applying to the Connecting Links Program, the applicant is required to provide inspection forms for all connecting link structures.

3. Connecting Link Asset Inventory, Conditions and Needs

Municipalities are required to submit detailed asset data on all connecting link road sections and structures (three metres or greater in length in the direction of traffic) under its jurisdiction. A map must be provided showing all connecting link road sections and structures. The map must indicate connecting link street and intersecting street names and other landmark references.

If the applicant has submitted all structure and road data within the last two-years, this information does not need to be resubmitted. However, where the information has been updated, it should be submitted. If it's the first time applying to the Connecting Links Program, the applicant is required to provide this information for all connecting link road sections and structures.

Appendix 6 includes the specific connecting link road section and structure data that must be submitted. The applicant shall submit this information in Excel or equivalent data file(s) that the ministry can import into Excel.

4. Connecting Link Maintenance Plan/Strategy

Applicants are required to indicate that there is an ongoing maintenance plan or strategy for connecting links. Effective maintenance of connecting link roadway and structures is critical to prevent premature deterioration of the asset and defer the need for costly rehabilitation or reconstruction. Examples include routing and sealing of cracks to prevent water entering the pavement structure and washing bridge expansion joints on a routine basis.

Applicants are also required to indicate that there is an ongoing inspection program to assess road sections and structures using sound condition ratings such as a Pavement Condition Index or Bridge Condition Index. Applicants should describe their methodology. All applicants are required to submit this information.

What are the requirements for Indigenous Community Consultation?

The Crown has a duty to consult, and where appropriate, accommodate Indigenous communities when contemplating a decision or action that has the potential to adversely impact credibly asserted or established Aboriginal or Treaty rights (the "duty to consult").

If triggered, the duty to consult has both informational and response components, and the Crown's duty to consult can vary widely and depends on the specific circumstances of the contemplated decision or action. The scope of the Crown's consultation obligations are determined by the strength of the claim to an asserted Aboriginal or Treaty right, and the potential impact of the proposed Crown conduct or decision on the established or asserted right.

Consultation generally involves providing timely and accessible information to the Indigenous community on the proposed Project, obtaining information from the Indigenous community on how their rights could be potentially affected if the Project were to go ahead, and determining how to address these concerns, including attempting to avoid, minimize, and/or mitigate adverse impacts on Aboriginal or Treaty rights.

Ontario has an obligation to assess whether or not the duty to consult is triggered by the funding of the Project. To assist, the application requires municipalities to indicate whether they have already consulted with Indigenous communities about the proposed Project. Applicants should identify any potential impacts to rights which may trigger the duty to consult. This includes any information about assertions or claims made to the municipality by Indigenous communities, and any concerns raised during previous consultation activities and how those were addressed. Additionally, the application requires the municipality to provide information on the characteristics of the land where the project is to take place and specific project activities and the potential for the project to adversely impact wildlife species.

The ministry will work with applicants as needed if the ministry determines that the duty to consult is triggered and may delegate the procedural aspects of the duty to consult to applicants. The ministry may assist with the consultation process where appropriate. It is expected that applicants should advise the MTO if there is a potential for the duty to consult to be triggered, and whether the applicant has already carried out consultation activities with potentially impacted Indigenous communities. Where this consultation is required, the applicant should appropriately plan and budget for this work as part of the project costs.

For more information on Ontario's duty to consult Indigenous communities, refer to the Duty to consult with Aboriginal peoples in Ontario web page at: <https://www.ontario.ca/page/duty-consult-aboriginal-peoples-ontario>.

How will applications be assessed?

Projects will be assessed on the basis of:

- Project criticality based on connecting link deficiencies and/or renewal needs;
- Project urgency based on stated 10-year deficiencies and risk assessment;
- Cost-effective and appropriate project to address stated connecting link need;
- Appropriate project activities and costs under the Connecting Links Program;
- Supporting documentation: asset management plan, bridge inspection reports, detailed project proposal, engineering studies/plans, etc.; and,
- Potential coordination with adjacent, concurrent provincial highway project.

MTO will prioritize projects that best meet the objectives of the Connecting Links Program, addressing critical and urgent connecting link needs first.

Funding decisions will take into consideration the ministry's prioritization of the projects, regional connecting link needs and the available budget in any year.

Will a municipality be notified if its application is unsuccessful?

Yes, both successful and unsuccessful applicants will be notified by the Ministry of Transportation after funding decisions are made. Unsuccessful municipalities are encouraged to contact their regional MTO representatives for feedback regarding their unsuccessful projects.

Section 8 – Contribution Agreement

The Contribution Agreement is a legal agreement that outlines the rights, responsibilities and obligations of the province and the municipality and includes various Schedules, e.g., project costs, milestones/timelines, reporting requirements, etc.

MTO will notify successful applicants by Minister letter that their project has been approved for funding. Municipalities may then begin the tendering process and incur project costs starting April 1, 2025. The ministry will provide the Contribution Agreement following the

Minister letter. The execution of the Agreement is required before payments can be made.

The signatures of the Head of Council and the Minister of Transportation are necessary to execute the agreement. Municipalities are encouraged to obtain Head of Council signature and a council resolution as soon as possible. Once co-signed by the Minister, the fully executed (signed by both parties) Contribution Agreement will be available in the TPON system for municipalities to download and save for their records.

How will the provincial funding flow?

Funding will be provided for eligible project costs on a milestone payment approach:

- Contract Award – 50%
- Substantial Completion – 35%
- Final Report – 15%

In order to be paid at these milestones it is critical that the project be completed on the submitted schedule. In the Application Form, the applicant is required to indicate the fiscal year of completion and any timeline risks, how long the delay could be and provide mitigation strategies. Schedule risks include the time required for tendering, delays due to regulatory approvals or third party agreements, utility relocations, inclement weather, etc. If the schedule risks are significant, consideration should be given to extending the project completion over two or three years. The ministry will approve the multi-year funding on this basis.

Funded municipalities will be required to state their anticipated dates for Contract, Substantial Completion and Final Report. These milestones must be achieved by specific timelines as follows:

Milestone 1: Award of First Contract	By June 30, 2025
Milestone 2: Substantial Completion	By December 31 of Fiscal Year of Completion
Milestone 3: Final Report	By March 8 of Fiscal Year of Completion

Milestone payments will be disbursed once the ministry has accepted the Milestone Report. The first payment will be made once the contribution agreement has been signed by both parties (spring/summer of 2025) and Milestone 1 has been submitted to MTO for review. The Substantial Completion and Final Report payments will be made on the basis of the actual incurred costs up to the approved funding amount. Cost overruns are not eligible for funding. Any unused funding must be returned to the Government of Ontario.

Appendix 4 – Scope of Eligible Work – Annexes

Annex A: Appliances and Works

Where construction or improvement of a connecting link makes it necessary to alter or relocate appliances and works of an operating corporation, the cost that may be eligible for cost sharing under the terms of an applicable agreement is to be established based on the group to which the appliances and works belong.

Group 1

Group 1 relates to appliances and works as defined under *The Public Service Works on Highways Act*, R.S.O. 1990, c.49 s.1, i.e., poles, wires, conduits, transformers, pipes, pipe lines or any other works, structures or appliances except water mains and sewers under **Group 3** placed on or under a highway by an operating corporation. An operating corporation being defined, under the above noted statute, as a municipal corporation or commission or a company or an individual operating or using a telephone or telegraph service, or transmitting, distributing or supplying electricity or artificial or natural gas for light, heat or power.

Group 2

Group 2 relates to appliances and works as defined under *The Public Service Works on Highways Act*, R.S.O. 1990, c.49 s.1, i.e., poles, wires, conduits, transformers, pipes, pipe lines or any other works, structures or appliances except water mains and sewers under **Group 3** placed on or under a highway by Ontario Hydro, Bell Telephone Company, gas pipeline companies operating under Federal Charter.

Group 3

Group 3 relates to watermains and sanitary sewers placed on or under a highway other than storm sewers (see **Annex D**) and operated by the municipality, municipal corporation, or commission or company or individual.

Annex B: Traffic Control Devices

The installation and improvement costs, on connecting links, of warranted traffic control signals and other approved traffic control devices, as detailed in the Ontario Traffic Manual (OTM), may be eligible for funding.

Traffic Control Signals

1. To qualify for funding all traffic control signal installations must comply with the OTM Book 12 and meet the warrants contained in section 4 of the manual;
2. The traffic control signals must also conform to the requirements of the *Highway Traffic Act*, R.S.O. 1990, Chapter H.8, and more specifically Regulation 626;
3. The installation should meet the technical requirements of the ministry as detailed in the Ontario Provincial Standards and Specifications;
4. Ministry approval of the traffic signal design required for all traffic control signals located on a highway designated as a connecting link as required under section 144(31.1) of the *Highway Traffic Act*;
5. The modernization of traffic control signals that were not eligible upon installation may be approved for funding by the ministry if the conditions set out under the requirements in 1. to 3. above, are met;
6. The installation of traffic control signals, as part of the construction or reconstruction of an entrance or within five years thereafter, is not eligible for funding even when the warrants are met. It is assumed the municipality will recover the cost of the installation of such traffic control signals from the owner or developer served by the entrance;
7. The installation of warranted traffic control signals at an existing entrance, more than five years after the construction or reconstruction of the entrance, is eligible for funding provided all other criteria are met;
8. The municipality agrees to maintain such other traffic controls (e.g., parking restrictions) as may, in the opinion of the ministry, be necessary to ensure the efficient operation of traffic signals and will confirm this in writing;
9. A portion of the capital costs associated with a computerized traffic management system may be eligible for funding. The needs of a traffic management system as it relates to the connecting link will dictate the amount of funding. The municipality needs to justify its request to the ministry. The ministry will review each case and approve the funding, as applicable, based on merit; and
10. New or replacements for traffic control signals and the associated appurtenances must meet accessibility standards as defined in Ontario Regulation 191/11 of the *Accessibility for Ontarians with Disabilities Act*.

Other Traffic Control Devices that may be eligible for funding include:

1. All traffic signs defined in Books 5 and 6 of the OTM, including the French translation;
2. Illuminated signs provided that they are eligible under Books 5 and 6 of the OTM and conform to the standard sign, shape and colour;
3. All miscellaneous traffic devices defined in Book 12 of the OTM;
4. All pavement hazard and delineation markings defined in Book 11;
5. Overhead signs approved by the ministry; and
6. All signs and markings defined in Regulation 615 of the *Highway Traffic Act*.

Note:

- All signs and markings regarding pedestrian crossovers are expected to be moved from Regulation 615 to a new Minister's Regulation which will also include signs and markings for new pedestrian crossing devices for lower speed/ lower volume roads.
- This process is expected to be completed by the middle of 2016 provided that Bill 85, *The Strengthening and Improving Government Act*, 2015 passes in 2015.
- Guidelines for new pedestrian crossing treatment devices will be available in OTM Book 15 when the new regulation comes into force.

Annex C: Illumination

The capital cost for the installation of illumination on connecting links at intersections may be eligible for funding under the following conditions:

1. The intersections have warranted traffic signals,
2. The intersections are unsignalized, fully channelized, and classified as rural intersections, or
3. The highway intersects an unprotected level railway crossing subject to National Transportation Agency Board Order.

A warrant for partial illumination is considered to exist for new municipal installations as follows:

1. Intersections in built-up areas (see *Highway Traffic Act*, R.S.O. 1990 c. H.8, for definition of "built-up" area) with raised medians on all approaches, separate right and left turn lanes, and 4 lanes or more on each approach;
2. Intersections in rural areas ("rural area" is an area not classified as "built-up area") where warranted traffic signals exist, or two 4 lane undivided highways meet and warrants for traffic signals are at least 80% fulfilled, or traffic is channelized by one or more islands;
3. Unprotected municipal highway/rail crossing where the National Railway Transportation Agency has authorized the installation of luminaries. The federal government share will be deducted from the total cost before calculating the funding;
4. Highway tunnels in built-up areas where the tunnel is more than 25 metres long;
5. Design levels for illumination, including materials types and luminaries selected, shall not exceed Ministry of Transportation illumination policy; and
6. Illumination necessitated by adjacent development and illumination at private or commercial entrances is the responsibility of the property owner. Funding is not applicable for the design, construction, or power for illuminating these areas.

Annex D: Drainage

The capital cost for the installation of storm sewers on connecting links may be eligible for funding as set out below.

1. Storm sewer must be an economical alternative to the maintenance of an open ditch with numerous entrance culverts;
2. Storm sewer must be necessary in order to increase the use of an existing right-of-way for roadway purposes;
3. Storm sewer must be necessary in order to increase the traffic carrying capacity of an existing roadway by allowing for parking off the travelled way;
4. The replacement of an existing storm sewer must be for reasons of deterioration or to increase the capacity if the existing storm sewer is less than 700 millimetres diameter;
5. Only the facilities required for the drainage associated with the highway are eligible for funding;

6. Where the diameter of a storm sewer to be installed is greater than 700 millimetres, only that portion of the cost that 700 millimetres bears to the diameter of a circle of equivalent area measured in millimetres of the storm sewer installed, may be eligible for funding;
7. Where an off-take storm sewer or open ditch to an appropriate outlet is required, it may be eligible for funding under the following conditions:
 - 7.1. Where the storm sewer pipe is greater than 700 millimetres, the criterion in 6. above applies; or
 - 7.2. Where an open ditch is used, the cost eligible for funding shall be based on the same percentage that was applied to the last section of storm sewer pipe leading to the open ditch.
8. Where an adequate existing storm sewer is altered to accommodate drainage that is not eligible, such alteration is not eligible for funding;
9. Where a storm sewer on a highway under the jurisdiction of the province is designed to accommodate both the provincial highway drainage needs and those of a connecting link eligible under the Connecting Links Program, only the lesser of the municipality's share of the cost of construction or that amount calculated as in 6. above may be eligible for funding;
10. Where the municipality constructs a storm sewer that is eligible for funding and provides additional capacity for the needs of another municipality that are also eligible for funding, only the amount calculated as in 6. above may be eligible for funding;
11. Sewer covers associated with storm sewer systems may be eligible for funding. Where the outlets from the sewer cover are greater than 700 millimetres in diameter, only that portion of the cost that 700 millimetres bears to the diameter of the outlet pipe in millimetres may be eligible for funding; and
12. Where a storm sewer is installed under the provisions of the *Drainage Act*, R.S.O. 1990, Chapter D.17, the assessment made against the municipality will be eligible for funding subject to the limitations in 11 above.

Annex E: Stormwater Management

The capital cost for the installation of stormwater detention facilities on connecting links may be eligible for funding as detailed below.

1. It will be the responsibility of the municipality to analyse and cost various drainage system alternatives and justify the final selection based on the most economical and environmentally responsible solution. At the request of the municipality, the ministry will provide guidance on the degree of detail required in submissions.
2. The maximum cost of a storm water management system, complete with detention components and/or combined sewer components, to be considered cannot exceed the total cost of a conventional system with continuous, separated, normal size pipes and/or ditches by more than 10% as detention facilities have greater environmental benefits than separated systems. The following provisions apply:
 - 2.1. The maximum cost of a stormwater management system is the unadjusted total cost to the municipality, not just the portion of total cost eligible for road funding;
 - 2.2. A subsystem of a larger system is acceptable for consideration; and
 - 2.3. In a combined sewer system, the cost of providing extra sewage treatment capacity to accommodate the extra flows will be included in the total cost for comparison purposes. However, this cost is not eligible for funding.
3. The eligible costs for funding of the stormwater detention system must be adjusted to pay for only that water associated with the connecting link highway.
4. For a stormwater detention facility to be considered for funding, the detention facility must be justified on the basis that a controlled release of water is necessary to prevent water damage downstream.
5. For ponds and retention tanks with pipe inlets, funding will be based on the "700 millimetres diameter rule" (refer to **Annex D**, section 6) applied to the inlet or the sum of the diameters of the inlets. If an oversized inlet is used the diameter of the first normal size upstream pipe is to be used.
6. The "700 millimetres diameter rule" will be applied to oversized pipes whose purpose is not detention.
7. Where funding is applicable for combined sewers, the capital cost is subject to the "700 millimetres diameter rule".
8. Inlet control of stormwater is accomplished by allowing stormwater to temporary pond upstream of catch basins or other outlets. The water slowly subsides as the storm passes. Inlet control, within the highway, is eligible for funding provided the maximum depth of water accumulation at the travelled edge of the roadway does not exceed 75 millimetres (designers use two-year flood), and the ponded water does not present a safety or health hazard.

Annex F: Detailed Design/Engineering Studies

A municipality may submit for funding for detailed design/engineering as part of a proposed construction project. Alternatively, a municipality may submit for funding of detailed design/engineering as a separate project prior to construction. In the case of the latter, the ministry will not guarantee funding for the construction project in the subsequent year. Funding for the construction would be considered along with other projects submitted in the following year.

The Ministry reserves the right to assess the components of the proposed detailed design and engineering to determine what scope of work is eligible for funding under the Connecting Links Program.

Applicants choosing to submit for funding of a separate detailed design/engineering study should:

1. Where applicable, include a copy of the preliminary design/engineering report for the proposed project completed by a professional engineer;
2. Include a copy of a proposal for detailed design and engineering, with quoted costs from a professional engineer;
3. Ensure road and bridge designs are undertaken according to the applicable municipal, provincial, federal, or other standards;
4. Include the appropriate scope of work for a detailed design/engineering study. Consideration for design elements may include, but are not limited to the following:
 - Site plans
 - Horizontal and vertical control data
 - Geometric design
 - Horizontal and vertical alignments
 - Pavement design, including life-cycle costing
 - Typical cross-sections
 - Design-cross-sections
 - Earth balance design
 - Grading
 - Drainage – quality and quantity, and storm sewer design
 - Utilities locations and relocations, where applicable
 - Illumination
 - Traffic control devices
 - Electrical design
 - Hydrotechnical design
 - General arrangement drawings (structures)
 - Foundation design
 - Substructure design
 - Superstructure design
 - Barriers, railings, expansion joints, bearings, protection systems
 - Traffic control plan, staging and detours
 - Traffic signing and pavement markings
 - PHM-125 approval
 - Property requirements
5. Ensure that the detail design/engineering study will establish a comprehensive cost estimate to construct the project;
6. Develop a schedule detailing the timing for:
 - Issuing RFP for detail design/engineering study
 - Commencement of detail design/engineering study
 - Completion of detail design/engineering study
 - Proposed timing for construction

7. Provide any info on whether the DTC has been considered and/or if any consultation with appropriate Indigenous Community has taken place.

Annex G: Contract Administration

It is expected that contract administration tasks will be carried out during project construction to verify:

- a) The work that was done during construction of the project;
- b) The quality of work and materials used during construction of the project, and;
- c) How much it will cost to complete construction of the project.

The contract administrator may be the municipality or a consultant retained by the municipality. Consultant's fees for contract administration services are eligible for funding. If the municipality is acting as contract administrator, the maximum amount allowable for contract administration cannot exceed 10% of total net eligible project costs.

The contract administrator will be responsible to monitor and approve any changes to the scope and costs for construction of the project. The municipality is responsible for any increase in project costs resulting from changes in the work. When changes in the work would be eligible for funding, additional funding may be considered on a case by case basis at the discretion of the ministry. The municipality shall pay all costs not approved by the ministry and all unforeseen costs of the construction work.

Change in the work: means the deletion, extension, increase, decrease or alteration of lines, grades, dimensions, quantities, methods, drawings, changes in the character of the work to be done or the materials of the work or part thereof, within the intended scope of the contract.

Consideration for tasks and services required for contract administration should include, but are not limited to

- Convene and attend a pre-construction meeting(s)
- Convene and attend construction progress meetings as scheduled
- Prepare and distribute agendas and minutes for all meetings
- Respond to contractor's questions, proposals, and requests for information.
- Prepare and issue all work orders, field orders and change orders
- Prepare and certify monthly progress payment certificates
- Co-ordinate and schedule inspection and testing activities related to quality control/quality assurance for construction materials and work
- Communication of all field and laboratory test results (i.e., compaction) in a timely manner

Contract administration services tasks shall accommodate all aspects of the contract process through the Warranty Period and the Final Completion Certificate.

Appendix 5 – Sustainable Construction Practices

MTO encourages municipalities to consider innovation and the use of sustainable construction practices for Connecting Link projects.

MTO procurement practices allow the use of recycled and reclaimed materials up to the maximum limits imposed by engineering standards to ensure that such materials are not used inappropriately and do not compromise the longevity of pavements and structures.

If recycled and reclaimed materials are used appropriately, then cost savings can be achieved through conservation of resources, elimination of disposal costs and reduction in energy requirements and greenhouse gas emissions.

Ministry specifications permit recycled/reclaimed materials to be used in lieu of natural aggregates. Examples include reclaimed asphalt pavement (RAP), reclaimed concrete material (RCM), air-cooled blast furnace slag (BFS), granulated blast furnace slag, crushed glass and ceramics and roofing shingle tabs (RST).

For example, Ontario Provincial Standard Specification (OPSS) 1151 (hot mix asphalt) allows up to 40% RAP in hot mix binder courses and up to 20% RAP in premium surface courses. Aggregates for road base and sub-base (OPSS.PROV 1010) may include up to 100% RCM, up to 100% BFS, up to 40% RAP, and up to 15% crushed glass and/or ceramics.

MTO and connecting link municipalities share an interest in ensuring the durability of asphalt applied on connecting links. This can best be accomplished by applying ministry quality of material specifications used on provincial highways.

Standard Specification requirements for the properties for the various grades of Performance Graded Asphalt Cements (PGAC) are given in MTO OPSS 1101, November 2014. Connecting link municipalities should have regard to Special Provision No. 111F09M, February 23, 2015 which requires additional testing requirements (including Extended Bending Beam Rheometer) and acceptance criteria for all PGAC grades. Suppliers of PGAC must be listed as an asphalt cement supplier in MTO's Designated Sources for Materials Manual (DSM).

The additional up-front costs for more sustainable construction practices will be offset by the extended life of connecting link pavement and structures. The use of higher grade construction materials, more rigorous materials testing, contact administration, etc., are eligible for subsidy.

For more information contact your local Ministry of Transportation regional office listed in Section 10.

Appendix 6 – Connecting Link Inventory Requirements

Applicants are required to submit an Excel file or equivalent data file for ministry import into Excel that includes the following information for road sections and structures (three metres in length or greater in direction of traffic) for all connecting links in the municipality.

This information will be used to determine the current state of connecting link infrastructure and the ten-year capital improvement needs across the province.

Two data tables are required: Table 1 below lists the road data items and Table 2 lists the structure data items to be included. Please submit only connecting link road/bridge data – no other municipal roads or structures.
